## SEAWING NOVA.

Beyond Compromise, Beyond Compare.

Introducing the Seawing Nova:  
A revolutionary new fin that combines classic SCUBAPRO styling and the latest technology to bring you a fin that propels powerfully, with minimal effort.

### PIVOT CONTROL TECHNOLOGY

Replacing the gradual curve of a traditional fin, the Seawing Nova has an articulated joint (like the tail joint of a dolphin) which allows the blade to pivot. The entire blade is now able to generate thrust; there is less drag, no wasted thrust.

With traditional paddle fins, the harder you kick, the more the blade bends. The result is that soft fins achieve the ideal 45° angle when kicked gently, but over-bend and lose thrust when kicked hard. Stiff fins achieve the 45° angle when kicked hard but remain too flat and therefore inefficient when kicked gently. Both require compromise.

The revolutionary Seawing Nova uses Pivot Control Technology to ensure that the most efficient angle of attack is maintained across all strengths of kick. No compromise needed.

### CLEAN WATER BLADE

The unmovable section between the foot pocket and the blade of a traditional fin generates excess drag. On the Seawing Nova, it simply isn't there— which means that water is free to flow cleanly onto the working section of the blade. Drag is reduced, and thrust is increased.

### VARIABLE BLADE GEOMETRY

As you kick harder, the Seawing Nova's wing-tips arc upward, increasing high-speed stability and reducing drag.

### ERGO2 FOOTPOCKET WITH POWER PLATE

The Seawing Nova features a super-ergonomic foot pocket that is exceptionally comfortable. The rigid Power Plate footplate extends to the back of the heel and ensures ultimate power transmission with less leg strain.

### BUNGEE HEEL STRAP

The fin can be easily secured on, or pulled off with the marine quality bungee heel strap.

### MONPRENE®

The space-age Monprene® elastomer provides superior technical characteristics and makes the Seawing Nova incredibly lightweight and durable, for a lifetime of great diving.

Available May 2009 **MSRP \$189.00**

**LIMITED LIFETIME WARRANTY**
